Customer:	M/s Allied Blenders & Distillers Pvt. Ltd.
Object:	Logistic area
Size:	10 900 m ²
Country:	India
Year:	2017
Fiber:	Fibrofor High Grade

Description

Newly built bottling plant for Allied Blenders & Distillers. Together with the engineering office M.R. WARERKAR & ASSOCIATES PVT. LTD. we designed the fiber reinforced outside logistic areas. The requirement of the customer was a risk-free solution consisting of a high quality fiber in combination with a static calculation based on international standards.

Key advantages of the Fibrofor High Grade Solution :

- Cost reduction (shorter construction time, no steel mesh, no mesh installation)
- No risk due to stable quality of the CE-marked High Grade fibers
- No corrosion at the surface, because of synthetic fibers
- Tailor made static calculation based on latest standards
