

Production & storage hall CB-tec, Ungerhausen (DE)

Application:	Industrial joint-less slab
Customer:	Condulith Deutsche Industrieboden-Technik GmbH
Object:	Production and storage hall
Size:	10.000 m ²
Country:	Germany
Year:	2017
Fibre:	Fibrofor High Grade

Description

Newly built production and storage hall for sawing natural stones. The special challenge was a joint-less slab construction with field sizes of 35 x 33 m with integrated drain channels. In addition the customer wanted a risk-free solution consisting of a high quality fiber in combination with a static calculation based on Eurocode standards. Supported by FABRINO our qualified partner in Germany.

Key advantages of the Fibrofor High Grade Solution :

- Cost reduction (shorter construction time, much less steel mesh installation)
- Possibility of joint-less slab constructions for lower maintenance costs
- Ability to work with concrete core activation system
- Tailor made static calculation based on latest standards
