

## Food Industry Stock, Sered (SK)

**Application:** Industrial slab  
**Customer:** I.D.C. Holding Slovakia  
**Object:** Food industry stock  
**Size:** 19'000 m<sup>2</sup>  
**Country:** Slovakia  
**Year:** 2016  
**Fibre:** Fibrofor High Grade

### Description

Large capacity warehouse for raw materials for the production of pastry products. In stock is an advanced electronically controlled rack system to provide logistics and material handling with unattended forklifts. The load on the shelves is 8.9 tons, the floor thickness 22 cm on the ground substrate compacted at  $Ev2 = 100 \text{ MPa}$

### Key advantages of the Fibrofor High Grade Solution :

- Massive reduction of the construction time of the floor
- Lower cost for the reinforcement due to the partial replacement of the steel
- Lower processing costs (no installation time for steel)
- No corrosion and low maintenance costs (jointless)
