

Recyclingcenter Zirec, Burgdorf (CH)

Application: Industrial slab
Customer: ZIREC
Object: Recyclinghall
Size: 3 500 m²
Country: Switzerland
Year: 2015
Fibre: Fibrofor High Grade

Description

Newly built Recyclinghall. On one hand the floor has to be resistant to oil, grease and alkali, on the other hand it has to be abrasion-resistant due to the use of excavators with shovels. In addition there are very high point loads caused by the feet of the lifting equipment.

Key advantages of the Fibrofor High Grade Solution :

- Costreduction (shorter construction time, no steel mesh, no installation of the mesh)
- resistance to oil, grease, alkali and abrasion
- Possibility to use recycling-concrete
