

Roundabouts & Outside standings, CH/DE

Application: Outside area
Object: Roundabouts, Outside standings
Country: Switzerland, Germany
Year: 2014
Fibre: Concrix , Fibrofor High Grade

Description

Roundabouts and outside standings made of asphalt suffer from deformations caused by heavy trucks and buses, especially during summer time.

Key advantages of the Fiber Solution for these kind of projects

- No deformation because of concrete construction (low maintenance)
- Short construction time (no time consuming installation of steelmesh)
- Lower cost for reinforcement (replacement or reduction of steel)
- No corrosion and thus lower future maintenance cost
- Free of charge state-of-the-art **static calculation (Eurocode 2)**
