

Warehouse Villeroy & Boch, Hódmezővásárhely (HU)

Application: Industrial slab
Customer: Villeroy & Boch Magyarország Kft.
Object: Storage hall
Size: 5 000 m²
Country: Hungary
Year: 2017
Fibre: Fibrofor High Grade

Description

Newly built warehouse for storing various ceramic products . The client requests for an economical but technical proper solution. The partly sideward opened facades of the hall at extremely conditions during winter and summer time can be also very demanding to the warehouse slab.

Key advantages of the Fibrofor High Grade Solution :

- Cost reduction (shorter construction time, no steel mesh, no mesh installation)
- Smooth and increased fracture toughness of the surface
- Freeze – thaw resistance of the fibers
- Tailor made static calculation based on European Standards EC 2
